

EDUCATION

- **University of Nottingham** 2023-2024
MSc, Human Computer Interaction (graduated with Distinction) Nottingham, United Kingdom
- **Ningbo University** 2018-2022
BSc, Logistics and Supply Chain Management Ningbo, China
- **University of Oxford** 2022
Winter School, Artificial Intelligence and Machine Learning Oxford, United Kingdom

ACADEMIC PAPERS

- **R. Yang** and C. Greenhalgh. "Comparing Experience Intensity of AR and VR in Contrasting Virtual Exposure Simulations." *Virtual Reality*, under review, 2026.
- S. Jin, **R. Yang**, W. Tong, and L. H. Lee. "AIs or Humans in Luxury Shopping? A Design Study of VR Shopping Assistants." *IEEE Conference on Virtual Reality and 3D User Interfaces (IEEE VR)*, poster accepted, 2026.

ACADEMIC EXPERIENCE

- **A Comparative Analysis of VR & AR in Dual-Phobia Virtual Exposure Therapy** [\[Paper\]](#) 2024-2025
MSc Project / Individual Research · Department of Computer Science, University of Nottingham
 - Designed and developed a Research-through-Design prototype comparing VR and AR efficacy in treating spider phobia and contamination fear.
 - Conducted a within-subjects experimental study (n=31) integrating questionnaires, behavioural metrics, and semi-structured interviews.
 - Performed statistical analysis using two-way repeated measures ANOVA, revealing VR's higher intensity induction while identifying AR's unique advantages for specific phobia types.
- **User Perception of Different Shopping Assistants in VR Retail** [\[Paper\]](#) [\[Video\]](#) 2025
Research Collaboration · Department of Engineering, University of Cambridge
 - Defined key variables, established experimental conditions, and compared users' perceptual and behavioural responses to four shopping assistant modes (3D avatar, webcam, voice, and AI) in a luxury VR shopping scenario.
 - Formulated and implemented the experimental procedure, specifying participant tasks, environment settings, and assistant interaction protocols.
 - Managed the execution of the user study (n=20). Integrated and cleaned multi-source user data, removing outliers and resolving missing values to generate clear, publication-quality visualisations.

AWARDS

- **GOSIM Spotlight Paris 2026 -- Frontier Creators** (Top 10 Featured Projects) 2026
- **2026 RealityX Hackathon -- AI*XR for Real-World Problem** (Best AI Use Prize) 2026
- **Cambridge EduX Hackathon 2025** (First Prize in AI-Powered Video Generation for Education Equality) 2025
- **Kan Tai-Keung Design Award 2021** 2021

PROFESSIONAL EXPERIENCE

- **AI Video Specialist** 01/2024-07/2024
O Shaped · Internship London, United Kingdom
 - Led AI video workflows for educational content, reducing production time by 40%, exploring generative AI as a scalable communication tool.
 - Analysed user feedback to iteratively refine AI-generated outputs, with a focus on usability, clarity, and design constraints.
 - Collaborated with cross-cultural teams to ensure AI content aligned with diverse user contexts and ethical considerations.

PROJECTS

- **Virtual Exposure Therapy Application** [\[Video\]](#) 2024-2025
 - Implemented hand-tracking in Unity to enhance presence and immersion, creating ecologically valid exposure scenarios.
 - Developed VR-MR exposure system with adaptive multi-level intensity and seamless mode transitions.
- **AR Gallery Treasure Hunt Game** [\[Video\]](#) 2024
 - Developed exhibition environment setups and modelled 3D content based on UoN Lakeside Arts exhibit materials and venue geography.
 - Designed location-based AR for spatial exploration, achieving 90% task completion rate.
- **VR Hand-gesture Dance Rhythm Game** [\[Website\]](#) 2025
 - Developed immersive VR environments in Unity with Spatial Audio and dynamic VFX.
 - Designed gesture-based interactions using Perceptual-Motor Coupling theory to minimise latency and enhance flow state.

SKILLS & INTERESTS

- **Research Methods:** Research-through-Design, Mixed Methods (Quant/Qual), Co-design, Usability Evaluation; **Data Analysis:** SPSS, Python; **XR/Game Dev:** Unity (C#), WebXR (A-Frame, WebGL), Spark AR; **Design/Prototyping:** Adobe Suite (Ps/Ai/Ae), Figma; **3D Modelling:** Blender, C4D; **Languages:** English, Mandarin, Taiwanese Hokkien
- **Interests:** Web & AI Dev ([Scholar Stream](#), [Mandarin FM](#), [AI Shrine](#), [Dream Core Generator](#))
